Dear TFRN Member,

We would like to invite you to the important upcoming meeting of the Expert Panel on Mitigation of Agricultural Nitrogen (EPMAN) which will be held in:

Dublin, Ireland, 24th-25th September 2009.

The meeting will take place over the full two days (0900 on the 24<sup>th</sup> September to 1700 on the 25<sup>th</sup>). Details of the venue (in central Dublin) and how to register can be found on the TFRN website at <http://www.clrtap-tfrn.org/EPMAN-3-info>.

The purpose of the meeting is to prepare the revised text for “The Guidance Document on Control Techniques for Preventing and Abating Emissions of Ammonia” in conjunction with preparation of a document outlining proposed options for the revision of Annex IX of the Gothenburg Protocol.

The Ammonia Guidance Document and the document on options for revision of Annex IX prepared at the Dublin Meeting will be forwarded to the 3<sup>rd</sup> meeting of the Task Force on Reactive Nitrogen on 24-25 November 2009, near Amsterdam. The TFRN-3 meeting will allow for discussion with the TFRN National Focal Points, where the documents will be finalized. Following the TFRN-3 meeting the documents will be submitted for consideration by the Working Group on Strategies and Review (WGSR). As the purpose of the TFRN-3 meeting is to agree the finalized documents, any members of TFRN who wish to propose new options, should table these for discussion at EPMAN-3. Further details on the overall process can be found in the attached informal note on “next steps”.

The revised Guidance Document should cover a large array of measures for ammonia abatement in support of the Annex IX revision. EPMAN-3 will bring together the discussions and considerable progress achieved at the April 2009 meetings of EPMAN and TFRN in Garmisch.

The EPMAN-3 meeting will be focused on the following items:

- Low emission land spreading of manure and mineral fertilizers
- Livestock feeding strategies
- Low emission housing of animals, especially cattle, and manure storage
- Options of how to consider possible farm size categories.

Three parallel groups will handle the first issues, with the last being considered in plenary.

Draft versions of the texts will be available from the 1<sup>st</sup> September on the TFRN website. All TFRN and EPMAN members are invited to send their comments and suggestions until 14<sup>th</sup> September. This will allow material tabled for the meeting to be considered in advance. Please, pay attention to the mentioned dates.

Best regards,

Shabtai Bittman and Martin Dedina  
Co-chairs of EPMAN
